

Name _____ Date _____

Electoral Numbers

Instructions: Use the 2012 Electoral Votes chart to solve the problems

1. Which state has the *most* electoral votes? _____
2. How many states have only 3 electoral votes? _____
3. If a candidate wins the electoral votes in California and Kansas, how many electoral votes will they have?
4. Using your answer from number 3, how many votes does the candidate still need in order to win the election?
5. Find the least number of states a candidate needs to win the election. Show your calculations, and write the names of the states required.
