## Electoral Votes Research

Instructions: Use the internet to find information about two research questions, as listed in the chart. Be sure to read each question carefully and the related questions.

Quote from Mini Page	How many times has this happened?	What years did this happen?	Did the unfaithful electors affect the election?
"in a very few cases, unfaithful electors haven't cast their vote for the winners, but this is very unusual."			

What do you think about unfaithful electors?

Quote from Mini Page	In what years did this happen?	Who won the presidency in these elections?
"If there is a tie, or no one gets as many as 270 votes, the House of Representatives must decide who will be president. Each state has only one vote... It has happened only twice in our history."		

Do you think it is fair for the House of Representatives to break the tie, or do you think we should do something else? Explain your answer.
